LEAN Guidelines

All Ads should adhere to LEAN Ad Standards as defined by [IAB 2017 New Standard Ad Unit Portfolio](#).

Additional details

The new guidance creates a more positive user experience by maximizing page load performance. This should also improve the performance of the ad. In addition to new initial load and sub-load max weights, the LEAN guidance dictates the following:

- Use lightweight file loads during initial load of the page
- Eliminate or minimize render blocking scripts like CSS, JavaScripts during initial load
- Use sub-load for rendering ad experiences that require heavy file weights
- Minimize number of files requested during initial load. The maximum number of Initial Load file requests allowed is 10
- Make user initiation required for ad functionality that needs large file downloads
